

Summer 2009

NYU-CCNY REU for the Science and Engineering of Soft Materials and Interfaces

The New York University-City College of New York REU (SESMI) provides 10-week summer research experiences for undergraduates from four-year colleges and research universities.

SESMI students work closely with NYU and CCNY research groups on innovative research projects that probe fundamental aspects of soft materials and interfaces. The program is interdisciplinary, combining chemistry, physics, and chemical engineering to examine forefront topics, including:

- Colloidal Assemblies
 - Biomolecules and Polymers
 - Crystal Growth and Design
 - Molecular Monolayers

SESMI students have access to state-of-the-art facilities, and they participate in professional development workshops for scientific writing and presentation, as well as ethics of research and publication. And they have the opportunity to sample life in the most exciting city in the world.

- *Cutting-edge research experiences*
- *\$4000 stipend + travel expenses*
- *Dormitory housing provided on vibrant Union Square!*
- *Professional development workshops*
- *Organized group activities*
- *Program Dates June 1 to August 7, 2009*

Send Application Material to Mr. Nathan Blouin

(nathan.blouin@nyu.edu)

see website for details.

Application Deadline February 15th, 2009
