Summer 2017 Upgrades

We hope you are having a productive and fulfilling fall semester so far! Campus Media is happy to announce we conducted, as per usual, upgrades in selected classrooms during the summer. Some of the highlights are:

- **Global Center for Academic and Spiritual Life, 2nd, 3rd and 4th floor** – During the summer of 2016 we started the first phase to upgrade these classrooms, which included new and improved wiring and projectors. This summer the presentation and interface equipment were upgraded. In addition to this, two classrooms (279 and 375) were upgraded with new accessible furniture (instructor’s table) to comply with ADA standards.
- **Silver Center, 2nd and 4th floor** – A total of 14 classrooms were upgraded to meet the 4K resolution standard. In addition to the latest processor support, new 4K flat panel displays were installed.
- **19 University Place, 102** – All the equipment in the lecture hall was refreshed and upgraded to support the 4K standard resolution. Among the new media equipment, there is a solid state laser projector, projection screen and an updated touch panel. The speech and program audio was also addressed.
- **Genomics (12 Waverly Place), G08** – The lecture hall was upgraded to support the 4K standard resolution. We also installed a new screen and a solid state laser projector.
- **Genomics (12 Waverly Place), LL113, LL114 and LL120; Silver Center, 5th floor; Meyer Hall, 102 and 261** – These classrooms were upgraded to meet the current 4K resolution standard, including the latest processor and media interface to support 4K devices.
- **Computer Replacement** – A total of 101 classroom computers were replaced, boasting an improved image.

---

**Event Media Services**

Event Media Services is a division of Campus Media services whose primary objective is to provide audio visual services and support for special events. We operate on a cost recovery basis and service the NYU community in a variety of venues that include multiple NYU owned locations as well as non-NYU rented spaces all around New York City.

Event Media Service’s inventory is a collection of modern high-tech equipment used to support events services such as livestreams, live performances and the repertoire of various events that are expected in institutions of higher education located in a metropolis like New York City.

For more information please visit Campus Media’s website or give us a call at 212-998-2655.

---

**Student Response System**

The Student Response System is an interactive polling service integrated with NYU Classes and provided in collaboration with eLearning and the Digital Studio. Please contact our office if you would like to learn more about the service.

Over the summer we upgraded the Student Response System software to a new version called TurningPoint. The new desktop software has an improved look and enhanced functionality while the dashboard remains easy to use. Similarly, the mobile app was upgraded to a new version called TurningPoint App. Both the software and mobile app are designed with a new color scheme and icon. The new versions replace TurningPoint Cloud and ResponseWare, implemented as part of the service last year.
Contact Us
We welcome any thoughts, suggestions, inquiries or comments about Campus Media's services and/or new technology you would like to incorporate into your class. You can contact us by phone at 212-998-2655 or by email at campusmedia@nyu.edu.

Natacha Jeanphilippe, our evening technician, grew up in Port-Au-Prince, Haiti and moved to NYC in 1993. She obtained two Associate Degrees and one Bachelor Degree from South University. She is currently pursuing her Master's Degree from Independence University. Natacha first started working for NYU in 2010 working as a Medical Assistant for the NYU College of Nursing with the Mobile Health Van Program. In 2015 she started working with Campus Media at our Silver Center location. Since 2016 she has worked at our Bobst Library office, where she provides excellent client assistance and problem resolution.

Keyboard Pilot & Wired Keyboards
During the summer 2017 semester we started a pilot program to eventually minimize issues with our wireless keyboards. The pilot will run until the end of the fall semester. We replaced the keyboards in multiple classrooms with three new keyboard models in order to compare their performance. The three keyboards selected for the pilot are:

- Microsoft Wireless All-in-One Media Keyboard – This model has the touchpad on the right side and is operated with AAA batteries. (Locations: 4th and 5th floor of 24 Waverly Place)
- Logitech Wireless Touch Keyboard K400 Plus – This model has the touchpad on the right side and is operated with AA batteries. (Locations: Silver 101A, 620 and 621; Goddard B01, B02, B04, B06 and B07)
- Logitech Illuminated Living Room Keyboard K830 - This model has the touchpad on the right side and is rechargeable via a micro-USB to USB cable. The biggest appeal to this model is we would no longer need to use batteries. (Locations: 194 Mercer 301, 303, 304 (Lab), 305, 306, 307 and 308)

We also incorporated wired keyboards in every classroom (except those part of the pilot) to give you an immediate option in case of an issue with the wireless keyboard.

Highlights: Our Bobst Library Office
The Campus Media office at 70 Washington Sq. South was opened in 2009 to support the classroom cluster at Bobst. The office is located in the lower level (LL1-44a). We support 15 classrooms (13 located in the lower level and 2 in the 8th floor). High-definition video projectors are installed in 11 classrooms while the remainder have 4K flat panels. Out of these rooms, two are outfitted for video conferencing interaction with other NYU campuses. Additionally, each classroom is equipped with a desktop PC and DVD player. Each podium also has an HDMI and VGA cable to connect a personal laptop. Equipment source selection and system operation is controlled with a user-friendly touch screen panel.

Daniel Levinson, our daytime technician, is a native New Yorker with a BA from Baruch at the Weissman School of Arts and Sciences. The wealth of knowledge he has accumulated, having worked four years at NYU and previously in A/V for CUNY, keeps faculty and students in good hands.

Course Capture Expansion - 60 5th Avenue
Course Capture, which allows you to record and archive your classes for later viewing, has been expanded to all Registrar Scheduled Classrooms in NYU’s 60 5th avenue building. Previously Course Capture was only available in select 60 5th avenue rooms, but over the summer break, with the majority of the AV integration completed, we were able to install it into the remaining classrooms.

The service is now available in 60 5th Ave: 110, 125, 150, 161, 165, 202, 250, 261, 265, C-04, C-10, C-12 and C-14; Meyer 121 and 122; Silver 405 and 520; Genomics G-08.
