

# PLEASE PARDON OUR APPEARANCE WHILE WE GO GREEN.

NYU is upgrading its “co-gen” plant with state-of-the-art, environmentally-friendly equipment. The project will triple our capacity to provide power to campus buildings allowing us to remove those buildings from the over-burdened local utility grid. The new co-gen plant will produce power more cleanly and result in significantly fewer local emissions for our neighborhood and our city.

The entire plant will be placed below ground and NYU will be working with the local community to design a new, vibrant, open, user-friendly green space.

This project will take approximately two years. If you have inquiries or complaints about the worksite, please call the NYU Facilities & Construction Management (FCM) Helpline @ 212.998.1001.
