Resolution of the Faculty Senators Council
Regarding Changes in Benefits
Approved November 12, 2009

At the November 12, 2009 meeting of the Faculty Senators Council, the Council approved two principles to be considered by the university administration in the decision-making process regarding changes in benefits.

The Faculty Senators Council recommends the following principles: 1) if cutting a benefit will result in no significant savings to the university nor will advance another compelling goal of the university, the benefit should not be cut; and 2) if a benefit can be modified so that it does not represent a significant cost to the university, the benefit should be modified rather than eliminated.
