Graduation Rate

Percentage of full time students who graduate within 6 years

| Low | Median | High |

Repayment Rate

Percentage of borrowers entering into repayment within 3 years of leaving school

This institution: National Average:

Median Borrowing

Students who borrow at NYU typically take out $x,xxx in Federal loans for their undergraduate study. The Federal loan payment over 10 years for this amount is approximately $xxx per month. Your borrowing may be different.
Please note:

1. The Estimated Cost of Attendance includes costs that appear on your bill, such as tuition, fees, and room and board. These costs are approved by the Board of Trustees in June each year. It also includes costs that are not paid to the University, such as books, supplies, transportation, and other personal expenses. For more information about NYU's Annual Cost of Attendance, visit NYU Financial Aid.

2. Most undergraduate scholarships are renewed at the same amount each year provided students are enrolled full time, file their financial aid forms on time each year, are making satisfactory academic progress, and have financial need similar to the time of the initial award.

3. Housing and Meals costs vary depending on Individual options. Information is updated annually: On-Campus Living

4. Transportation costs vary greatly by individual circumstances.

5. Books and Supplies are based on the typical student costs and may vary by individual and program of study.

6. Other educational costs vary per student but can include loan origination fees and course-specific charges.

7. Health insurance costs are not included. Please see New York University’s Student Health Center, Insurance and Patient Accounts website at: NYU Student Health Center

8. NYU'S School Default rate, the share of student borrowers entering repayment and defaulting on their loan, is x%. This is compared to the national average of x%.

The information contained here does not create a contract or any legal obligation on the part of NYU.

**Glossary**

**Cost of Attendance (COA):** The total amount (not including grants and scholarships) that it will cost you to go to school during the 2015–16 school year. COA includes tuition and fees; housing and meals; and allowances for books, supplies, transportation, loan fees, and dependent care. It also includes miscellaneous and personal expenses, such as an allowance for the rental or purchase of a personal computer; costs related to a disability; and reasonable costs for eligible study-abroad programs. For students attending less than half-time, the COA includes tuition and fees; an allowance for books, supplies, and transportation; and dependent care expenses.

**Total Grants and Scholarships:** Student aid funds that do not have to be repaid. Grants are often need-based, while scholarships are usually merit-based. Occasionally you might have to pay back part or all of a grant if, for example, you withdraw from school before finishing a semester.

**Net Costs:** An estimate of the actual costs that you or your family will need to pay during the 2015–16 school year to cover education expenses at a particular school. Net costs are determined by taking the institution's cost of attendance and subtracting your grants and scholarships.

**Work-Study:** A federal student aid program that provides part-time employment while you are enrolled in school to help pay your education expenses.

**Loans:** Borrowed money that must be repaid with interest. Loans from the federal government typically have a lower interest rate than loans from private lenders. Federal loans, listed from most advantageous to least advantageous, are called Federal Perkins Loans, Direct Subsidized Loans, Direct Unsubsidized Loans, and Direct PLUS Loans. You can find more information about federal loans at StudentAid.gov.

**Family Contribution (also referred to as Expected Family Contribution):** A number used by a school to calculate how much financial aid you are eligible to receive, if any. It’s based on the financial information you provided in your Free Application for Federal Student Aid (FAFSA). It’s not the amount of money your family will have to pay for college, nor is it the amount of federal student aid you will receive. The family contribution is reported to you on your Student Aid Report, also known as the SAR.

**Graduation Rate:** The graduation rate after 150% of normal program completion time has elapsed. For schools that award predominately bachelor’s (four-year) degrees, this is after six years, and for students seeking an associates (two-year) degree, this is after three years. For students seeking a certificate, the length of time depends on the certificate sought, for example, for a one-year certificate, after 18 months. These rates are only for full-time students enrolled for the first time.

**Repayment Rate:** The share of students who have repaid at least $1 of the principal balance on their federal loans within 3 years of leaving school.

**Median Borrowing:** The amount in federal loans the typical undergraduate student takes out at a particular institution. It also indicates the monthly payments that an average student would pay on that amount using a 10-year repayment plan.
