Help children with communication disorders learn to interact with their peers, empower patients to reverse the impact of diseases through nutrition, or conduct epidemiological research to help reduce deaths from malaria in sub-Saharan Africa. Studying the health and human services professions—including speech pathology, education, health care, nutrition, social work, and psychology—will prepare you to work in some of the most rewarding and in-demand fields you can enter. NYU’s undergraduate programs in health and human services provide you with the theoretical learning and hands-on experience to fulfill your goal of working to improve the health and well-being of others.
With locations in New York City and around the globe, NYU offers more than 230 areas of study, over 2,700 undergraduate courses, and an additional 3,300 graduate courses. You begin your college career at one of three degree-granting campuses: New York, Abu Dhabi, or Shanghai. You may also study at NYU’s global academic centers or at partner institutions around the world.

You can pursue your studies in health and human services at NYU Abu Dhabi or at NYU New York in the College of Arts and Science, the College of Nursing, the Silver School of Social Work, or the Steinhardt School of Culture, Education, and Human Development. Programs are in development for NYU Shanghai. To help you explore your options, we’ve divided NYU’s undergraduate programs into the following fields.

- Behavioral and Cognitive Science
- Education
- Global Public Health
- Health Care
- Nutrition and Food Studies
- Social Work and Public Policy
NYU New York
Applied Psychology
Child and Adolescent Mental Health Studies
Communicative Sciences and Disorders
Gender and Sexuality Studies
Global Public Health/Anthropology (double major offered jointly by the College of Arts and Science and the Global Institute of Public Health)
Global Public Health/Applied Psychology (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)
Global Public Health/Communicative Sciences (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)

NYU Abu Dhabi
Brain and Cognitive Science (specialization)
Psychology

Global Public Health/Sociology (double major offered jointly by the College of Arts and Science and the Global Institute of Public Health)
Language and Mind
Neural Science
Psychology

PSYCHOLOGY IN FLORENCE: Do you want to be a psych major? Then you might be interested in spending a semester at NYU Florence where you can stay on track by taking courses such as Developmental Psychology and Cognition. For more information on course offerings at NYU’s global academic centers, visit admissions.nyu.edu.

BEHAVIORAL AND COGNITIVE SCIENCE
Are you fascinated by the inner workings of the human mind and the way that they affect people’s interactions with one another? At NYU, you can gain a comprehensive education in the theoretical and practical aspects of psychology, neural science, mental health studies, and other related disciplines. You may find yourself observing ongoing therapy by speech pathologists in the University’s on-campus clinic in New York as a communicative sciences and disorders major. You may complete fieldwork in social services and community agencies as an applied psychology major. You may work hand-in-hand with your professor on a research project or conduct your own experiments as a neural science major. Links between theory, research, and application are a recurrent theme at NYU.
GLOBAL PUBLIC HEALTH

If you're concerned about social justice and the future of the world's populations, global public health may be the major for you. NYU is one of only a handful of universities in the US that offer undergraduate majors in this quickly expanding field. With social justice at the center of their studies, global public health students endeavor to come up with solutions to some of today's most pressing issues, such as: How is climate change affecting public health in different parts of the world? How can we improve access to health care in the United States? What is the best way to reduce deaths in sub-Saharan Africa?

GLOBAL PUBLIC HEALTH COURSES ABROAD

As a global public health major, you will have important opportunities for hands-on experience in the field at NYU's global locations. For example, you may choose health and society or global nutrition in Accra, Ghana; intern in global public health in Buenos Aires, Argentina; or study epidemiology in Tel Aviv, Israel. For more information on course offerings at NYU's global academic centers, visit admissions.nyu.edu.

EDUCATION

In the Steinhardt School of Culture, Education, and Human Development’s renowned New York-based teacher education programs, you will become actively engaged in the field of teaching in one of the most diverse environments in the world. You will take part in field-based activities throughout your four years of college and student teach for two to four semesters in New York City schools that are populated with students from nearly every world culture. If you decide to study at NYU Abu Dhabi, you can explore the history and sociology of education from an international perspective, focusing on how education varies in urban centers throughout the world.

NYU New York
Childhood Education/Childhood Special Education
Early Childhood Education/Early Childhood Special Education (birth–grade 2)
Education (preprofessional track)
Educational Theatre
Music Education (grades K–12)

Secondary Education, grades 7-12, with a teaching specialization in English, foreign languages, mathematics, music, science (biology, chemistry, earth science, physics), or social studies Teaching Students with Speech and Language Disabilities, all grades

NYU Abu Dhabi
Education

NYU New York
Global Public Health/Anthropology (double major offered jointly by the College of Arts and Science and the Global Institute of Public Health)
Global Public Health/Applied Psychology (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)
Global Public Health/Communicative Sciences and Disorders (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)
Global Public Health/Education (double major offered jointly by the College of Arts and Science and the Global Institute of Public Health)
Global Public Health/Social Work (double major offered jointly by the Silver School of Social Work and the Global Institute of Public Health)

NYU Abu Dhabi
Global Public Health/Nutrition and Dietetics (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)
Global Public Health/Prehealth (double major offered jointly by the College of Arts and Science and the Global Institute of Public Health)

GLobal Public Health Courses Abroad
As a global public health major, you will have important opportunities for hands-on experience in the field at NYU’s global locations. For example, you may choose health and society or global nutrition in Accra, Ghana; intern in global public health in Buenos Aires, Argentina; or study epidemiology in Tel Aviv, Israel. For more information on course offerings at NYU’s global academic centers, visit admissions.nyu.edu.
HEALTH CARE

NYU’s relationships with major hospitals and medical centers provide you with extraordinary opportunities for research and experience in the health professions. At NYU, you can explore nursing science and theory in one of the country’s oldest and most respected undergraduate programs while gaining clinical experience at New York City’s leading health care facilities. If your career aspirations are in medicine, dentistry, or another health care profession, NYU’s preprofessional programs will give you an edge to get into the nation’s most prestigious professional schools. The College of Arts and Science is regularly rated among the top five in the country for medical school placement, and NYU Abu Dhabi prepares you with the strong scientific foundation necessary for entry to professional school.

NYU New York
- Dentistry (preprofessional specialization)
- Dentistry: B.A.-D.D.S.: Dual-Degree Program for Entering Freshmen (offered by the College of Arts and Science and the College of Dentistry)
- Medicine (preprofessional specialization)
- Nursing
- Optometry (preprofessional specialization)
- Podiatry (preprofessional specialization)

NYU Abu Dhabi
- Premedical and Health Studies (preprofessional track)

NYU’s new academic center in Washington, DC, offers four levels of courses in American Sign Language taught in a visual-manual method without using spoken English.
At the Silver School of Social Work, Professor Peggy Morton is teaching a course called Human Behavior in the Social Environment.
NUTRITION AND FOOD STUDIES
New York City is home to a lively food scene—with many popular farmer’s markets, a staggering range of ethnic cuisines, and a growing number of top restaurants committed to “farm to table” food preparation. Students who major in nutrition and food studies learn about the significance of food choices and how they vary based on economic status, family background, and social trends. You may pursue a vast variety of internships in television studios, newspapers, hospitals, restaurants, or the University’s own community-supported agriculture project. If you want to become a registered dietician, you may pursue the nutrition and dietetics specialization within the nutrition and food studies major.

NYU New York
Global Public Health/Food Studies (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)
Global Public Health/Nutrition and Dietetics (double major offered jointly by the Steinhardt School of Culture, Education, and Human Development and the Global Institute of Public Health)

NYU Abu Dhabi
Nutrition and Food Studies (with concentrations in nutrition and dietetics, food studies, and food and restaurant management)

SOCIAL WORK AND PUBLIC POLICY
Do you have a natural curiosity about people and the desire to understand and create solutions for the social problems that affect them? Translate your empathy for others into a career as a social worker by studying at NYU’s Silver School of Social Work. This major prepares you for a broad scope of career choices—from working directly with individuals or families to law, child advocacy, community organization, occupational therapy, or social planning. The social research and public policy major at NYU Abu Dhabi prepares you for a job with a nongovernmental organization or in public service, urban planning, or community action. NYUAD also offers an opportunity to combine your bachelor’s degree program with a master’s degree program in public administration.

Social Research and Public Policy

NUTRITION AND FOOD STUDIES IN TEL AVIV
Explore the relationships between food, class, and gender by taking Food and Identity at NYU Tel Aviv. For more information on course offerings at NYU’s global academic centers, visit admissions.nyu.edu.
Studying a health-related major at NYU gives you the opportunity to gain hands-on experience in some of the best health care facilities and organizations in the world, many of which are located in New York City. Here are just a few examples of how NYU students gain real-world skills as undergraduates.

- Social work majors participate in three full semesters of supervised field instruction (700 hours), delivering social work services at sites including Bellevue Hospital, Children’s Defense Fund, Henry Street Settlement, and the LGBT Community Center.

- Nursing majors gain clinical experience in some of New York’s most esteemed hospitals, such as Beth Israel Medical Center, Lenox Hill Hospital, and the NYU Langone Medical Center’s Tisch Hospital and Rusk Institute of Rehabilitation Medicine.

- Nutrition and food studies majors take courses that put them on the forefront of knowledge in an emerging field, taught by experts such as Marion Nestle, who was named by best-selling author and Forbes writer Michael Pollan as the #2 “foodie” in America, with only Michelle Obama above her.

- Global public health students intern at the United Nations or in nongovernmental organizations.

- At NYU Abu Dhabi, seven major faculty research initiatives provide opportunities for students to work directly with faculty experts in their field. All of these projects focus on globally relevant themes and include centers for computational physics, prototype climate modeling, technology and economic development, and cloud computing.

Internships and fieldwork, semesters abroad, networking with over 400,000 alumni, and conducting research in labs with faculty mentors take classroom studies into a world of practical experience.
At NYU, no matter what program you choose, you will gain a firm foundation in the liberal arts. Many majors are interdisciplinary and enable you to take courses in more than one school, college, or program. You may opt for a double major or, in some fields, a dual-degree program in which you earn your bachelor’s and an advanced degree in an abbreviated time frame. If you choose one of the health and human services majors, you will have access to NYU’s many resources to help you navigate your educational path.

**SELF-DESIGNED MAJORS**

Do your academic interests transcend the traditional programs of study? At NYU’s Gallatin School of Individualized Study, you have the opportunity to be creative about your major by working closely with a faculty adviser to design your own undergraduate program with courses carefully selected from across NYU’s schools, colleges, and programs. For example, you can combine public policy with urban design and architecture studies, premedical preparation with the philosophy of medicine, or neural science with psychology. You’ll explore your interests outside of the classroom through internships, independent studies, and private lessons in the arts.

The College of Arts and Science also offers a self-designed honors major that enables you to integrate course work from more than one program within the College. You submit a proposal by the end of your sophomore year for this self-designed major.
PREHEALTH PROGRAMS AT NYU

Your bachelor’s degree program is your first step toward professional or graduate school in medicine, veterinary science, optometry, dentistry, or public health. At NYU, preprofessional programs, traditionally known as premed, are referred to as “prehealth.” The Robert and Ellen Salant Prehealth Program at NYU’s College of Arts and Science provides you with expert advice throughout your college career—making sure that you fulfill all of the undergraduate requirements necessary for grad school. Prehealth students meet regularly with the assistant dean for professional advisement. For help navigating your prehealth options at NYU, visit admissions.nyu.edu.

DUAL-DEGREE PROGRAMS

In dual-degree programs, you earn two degrees, either two bachelor’s or a bachelor’s and an advanced degree, in an abbreviated amount of time. The following dual-degree programs in health and human services are available at NYU:

- Biology/Teaching Biology, Grades 7-12: B.A./M.A. (offered by the College of Arts and Science and the Steinhardt School of Culture, Education, and Human Development)
- Chemistry/Teaching Chemistry, Grades 7-12: B.A./M.A. (offered by the College of Arts and Science and the Steinhardt School of Culture, Education, and Human Development)
- Dentistry: B.A.-D.D.S.: Dual-Degree Program for Entering Freshmen (offered by the College of Arts and Science and the College of Dentistry)
- English and American Literature/Teaching English, Grades 7-12: B.A./M.A. (offered by the College of Arts and Science and the Steinhardt School of Culture, Education, and Human Development)
- Global Liberal Studies/Health Policy and Management: B.A./M.P.A. (offered by Global Liberal Studies and the Robert F. Wagner Graduate School of Public Service)
- History/Teaching Social Studies, Grades 7-12: B.A./M.A. (offered by the College of Arts and Science and the Steinhardt School of Culture, Education, and Human Development)
- Individualized Major: B.A.-M.P.A. in Health Policy and Management (offered by the Gallatin School of Individualized Study and the Robert F. Wagner Graduate School of Public Service)
- Individualized Major: B.A.-M.P.A. in Public and Nonprofit Management and Policy (offered by the Gallatin School of Individualized Study and the Robert F. Wagner Graduate School of Public Service)

Nursing fieldwork in urban hospitals and health care centers provides essential skills for your first full-time job placement; the average starting salary in nursing is $70,000.
All NYU undergraduates complete a foundational core curriculum in the liberal arts and sciences. Your abilities for critical thinking, creative problem-solving, and persuasive communication are essential skills for success after college.

**CORE CURRICULUM**

In New York’s schools, colleges, and programs, many of the courses you take to fulfill core requirements are drawn from the Morse Academic Plan (MAP), the core curriculum at the College of Arts and Science. You select from a wide range of courses in these four areas: Foundations of Contemporary Culture, Foundations of Scientific Inquiry, Expository Writing, and Foreign Language.

At NYU Abu Dhabi, the core courses provide you with practical knowledge in four key areas: Pathways of World Literature; Structures of Thought and Society; Art, Technology, and Invention; and Ideas and Methods of Science. NYU Shanghai’s core curriculum has five components: Language, Writing, Social and Cultural Foundations, Mathematics, and Science.

**LIBERAL STUDIES: THE CORE PROGRAM**

The two-year Liberal Studies Core Program is a writing-intensive, interdisciplinary program that emphasizes the great books, works of art, and ideas of world cultures. You may spend your freshman year either in New York or at one of NYU’s global academic centers in London, Paris, or Florence. In the second year, you begin to take courses in the College of Arts and Science, or in another school, college, or program to which you intend to transition in your junior year to complete your bachelor’s degree. Another option is to continue on to complete the four-year program in Global Liberal Studies, a one-of-a-kind program with a requirement for you to spend your junior year at a location within NYU’s global network.
At the College of Arts and Science, the Morse Academic Plan (MAP) provides an academic core in the humanities, sciences, and social sciences. Most students take at least some courses from the MAP curriculum.
NYU’s global network provides a unique university architecture—an organic and integrated system of locations, resources, and opportunities. With the three degree-granting campuses in New York, Abu Dhabi, and Shanghai; global academic centers on six continents; and exchange agreements with 16 partner institutions around the globe, NYU offers unparalleled study abroad and international curricular programming.

NYU-Poly
The Polytechnic Institute of NYU, or NYU-Poly, is an affiliated institution of NYU located in neighboring downtown Brooklyn. It is one of New York’s most comprehensive schools of engineering, applied science, and technology—and is the second oldest in the state. If you are interested in engineering, applied science, and/or technology, you may directly enroll at NYU-Poly or explore our dual degree program in science and engineering jointly offered through NYU’s College of Arts and Science and NYU-Poly.

NYU Abu Dhabi
NYU Abu Dhabi is a highly selective undergraduate college blending a global academic opportunity with a liberal arts, science, and engineering curriculum. As the first such campus operated by an American university outside of the United States and the only comprehensive liberal arts and science college with engineering in the Middle East that is fully integrated into a major research university, NYU Abu Dhabi draws high school graduates with top qualifications from around the globe. NYUAD offers bachelor’s degree programs in these areas:

*Arts and Humanities*
Film and New Media
History
Literature
Music
Philosophy
Theatre
Visual Arts

*Engineering*
General Engineering
Civil Engineering
Computer Engineering
Electrical Engineering
Mechanical Engineering

*Multidisciplinary Program*
