Annual Notice to Students of the Family Educational Rights and Privacy Act

Annually, New York University informs students of their rights under the Family Educational Rights and Privacy Act (FERPA) and the regulations relating to FERPA promulgated by the U.S. Department of Education. Together, FERPA and the FERPA regulations provide that (a) each student has a right to inspect and review his or her education records; (b) each student may request that any such record be amended if he or she believes that it is inaccurate, misleading, or otherwise in violation of his or her privacy rights; (c) the University will obtain the student’s written consent prior to disclosing personally identifiable information about the student from his or her education records, unless such consent is not required by FERPA and the FERPA regulations; (d) each student has a right to file a complaint with the Family Policy Compliance Office of the U.S. Department of Education if he or she feels the University has failed to comply with the requirements of FERPA and the FERPA regulations; and (e) each student may obtain a copy of the University’s Guidelines for Compliance with the Family Educational Rights and Privacy Act. These guidelines are available from the Office of Academic Program Review, 194 Mercer Street, Room 403F, and at www.nyu.edu/apr/ferpa.htm. Mr. Barnett W. Hamberger, assistant provost and director of the Office of Academic Program Review, is responsible for administering FERPA at New York University. His telephone number is 212-998-2310.

Pursuant to FERPA and the FERPA regulations, New York University hereby designates the following categories of student information as “directory information.” Such information may be disclosed for any purpose, at the discretion of the University, except as provided below.

Category 1: Name, dates of attendance, class, previous institution(s) attended, major fields of study, degree(s) conferred (including dates), honors (including dean’s list), and awards.

Category 2: Past and present participation in officially recognized sports and activities, physical factors (e.g., height, weight of athletes), date and place of birth.

Currently enrolled students may refuse to permit disclosure of this information. To do so, written notification on University forms must be filed by the student in the recording office of his or her school prior to October 1, March 1, or July 1, depending on whether the student’s first term of enrollment during the academic year is the fall, spring, or summer term. This request is valid only for the academic year in which it is made. A new form requesting nondisclosure must be completed each academic year. Forms for this purpose are available in the Office of the University Registrar, 25 West Fourth Street, for the School of Law, the College of Dentistry, the Stern School of Business Graduate Division, and the School of Medicine.

If a student does not specifically request the withholding of directory information by filing the appropriate University form, as indicated above, the University assumes that he or she approves of the disclosure of such information. The University disclaims any and all liability for inadvertent disclosure of directory information designated to be withheld.

Requests for record review at the School of Medicine should be directed to Maureen Doran, director of the Office of Registration/Student Records.

University Policy on Patents

Students offered research opportunities are reminded that inventions arising from participation in such research are governed by the University’s “Statement of Policy on Patents,” a copy of which may be found in the Faculty Handbook or obtained from the Dean’s Office.

*Health insurance fees are added to your charges if you are not covered by other insurance.
The Office of Diversity Affairs

The New York University School of Medicine recognizes that diversity is essential in order to carry out its mission of conducting excellent research and providing outstanding education and clinical care. The Office of Diversity Affairs (ODA) supports this mission by developing and implementing initiatives to ensure that sound diversity and cultural competency policies inform the medical school curriculum and biomedical research and patient care practices at the Medical Center.

ODA works closely with the various departments and with students and faculty from diverse groups to ensure that mentoring and professional development needs are adequately met. Seminars and conferences organized by ODA stimulate institution-wide conversation on diversity, community health, health disparities, and culture and medicine. ODA also engages medical students in community outreach and K-16 pipeline programs to enhance community health and increase diversity in the medical workforce. ODA promotes interaction and builds partnerships with organizations and community groups engaged in developing a diverse health care workforce and reducing health disparities. It also supports the Medical Center's interest in global health by exploring international collaboration.
