WEB APP DEVELOPER

Housed within the Division of Student Affairs, the NYU Office of Interactive Media (OIM) seeks to improve the student experience through communications, innovation, and customer service.

We are seeking a developer to build a mobile-friendly web application and database (front- and back-end) to track skill development for students throughout their college careers, similar to a learning management system.

Your role will be technical lead on the project from start to finish.

The project is on a tight timeline. Ideally, testing would begin in July 2016 for a scheduled beta launch in August 2016. The bulk of the work will happen during the summer, with an opportunity to continue throughout the academic year.

This is a paid opportunity.

NECESSARY SKILLS

- Mastery of web development including HTML, CSS, JavaScript, and responsive design
- Experience with server-side programming and models including APIs
- Working proficiency and communication skills in verbal and written English

OUR IDEAL CANDIDATE

- Expertise and hands-on experience with web development including HTML, CSS, JavaScript, and response design
- Expertise and hands-on experience with server-side programming including node.js, PHP, and working with / creating APIs
- Embraces feedback and iterative processes
- Works productively remotely and in an office environment and actively takes initiative
- Personifies our Culture Code
