Welcome to the National Campus Climate Survey (NCCS)!

{UNIV_NAME} has contracted with the NCCS, in partnership with the University of Michigan and SoundRocket, to assist in {UNIV_NAME}’s efforts to assess the campus climate and culture, the programs offered in response to these issues, and the degree to which students feel safe and respected, particularly in regards to issues of sexual misconduct.

Some of the questions in this survey use explicit language, including anatomical names of body parts and specific behaviors, to ask about sexual situations. This survey also asks about sexual misconduct, including sexual harassment, sexual assault, stalking, and intimate partner violence, which may be upsetting. You may stop the survey at any time. If you would like to talk to someone confidentially about questions or concerns relating to sexual misconduct, including sexual assault, please contact {CENTER_CONTACT}.

Please click Next to begin!

Thank you for participating in this important survey!

CALCULATIONS

{NOTE: To keep fully consistent with Department of Education standards http://www2.ed.gov/policy/rschstat/guid/raceethnicity/questions.html, we should calculate categories for “multi-racial” and “Unknown” as well. The NonResAlien and Ethnicity variables are created to remove the differentiation between a “no” and “null” response to those items as being meaningful for the required reporting.}

“STALKING occurs when a person engages in a course of conduct toward another person under circumstances that would cause a reasonable person to fear bodily injury or experience substantial emotional distress.

COURSE of conduct means two or more acts including but not limited to unwelcome acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveils, threatens, or communicates to or about a person, or interferes with a person’s property.

SUBSTANTIAL EMOTIONAL DISTRESS means significant mental suffering or anguish.

STALKING INCLUDES the concept of cyber-stalking, a particular form of stalking in which electronic media such as the internet, social networks, blogs, cell phones, texts, or other similar devices or forms of contact are used.”
