

THE **Strategic Choice** FOR
TOMORROW'S **Leaders** IN **Dentistry**

New York University

COLLEGE OF DENTISTRY

>> **Dramatic** new scientific breakthroughs, changing societal needs, and globalization are just a few of the forces creating new challenges, opportunities, and priorities for dentistry. Responding to these forces will require a new generation of leaders capable of the strategic thinking necessary to advance dentistry's stature and impact in the new millennium. Where will these leaders come from? The answer: **a leadership school.**

In less than a decade, New York University College of Dentistry (NYUCD) has become a "leadership" school, perhaps the leadership dental school. Indeed, an article in *Crain's New York* called NYUCD **"one of the nation's top schools."** NYUCD is now one of the handful of dental schools emulated by other schools of dentistry in the US and around the world.

NYUCD IS THE ONLY DENTAL SCHOOL TO OFFER A NON-DISSECTION ANATOMY CURRICULUM USING **plastinated specimens** AS AN EDUCATIONAL MODEL, WHICH ALLOWS STUDENTS MORE TIME TO LEARN AND ASSIMILATE ANATOMY.

>> **Location, Size, Diversity = Leverage**

Three unique assets set NYUCD apart. One is size and the impact that comes with it. NYUCD is the largest dental school in the US, educating more than eight percent of our nation's dentists. Second is our extraordinary global reach – NYUCD boasts a level of national and international diversity unmatched by other dental schools. Third is our location in New York City, which allows us to leverage both the media and industry in ways that other dental schools cannot do.

A leadership SCHOOL
FOR THE 21st century

Unequaled Clinical Experience

Students at NYUCD provide care for nearly 275,000 patient visits annually – more than at any other dental school. NYUCD students have contact with patients early in the curriculum and continuing throughout their education.

World-Class Faculty

In an unprecedented way, NYUCD has recruited top faculty who are devoted to providing students with the full range of clinical and basic science training in order to prepare them for leadership roles in our nation's health care system. Students and faculty are engaged with one another both within and outside the classroom, challenging and energizing one another on multiple levels.

>> A New Dental Education Model

NYUCD has replaced the traditional dental education model with a new paradigm, one that focuses squarely on training students to be great people first – people of high integrity and ethical character – and then great dentists. A key component of that model is a partnership between students and faculty. Faculty relate to students as entry-level associates in their own practice, resulting in a joint – and rigorous – pursuit of knowledge.

NYUCD IS WELL ON ITS WAY TO BECOMING THE DENTAL SCHOOL WITH THE **greatest impact globally** ON THE HEALTH OF SOCIETY.

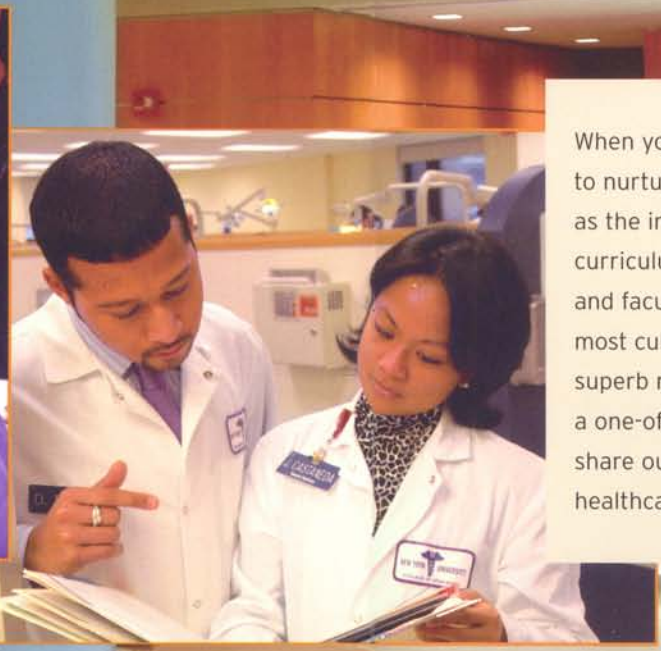

BLUESTONE CENTER FOR CLINICAL RESEARCH

>> **Leadership in Research** NYUCD ranks sixth in federal research grants to dental institutions* and first among private dental schools. Leadership areas include engineering artificial muscle, the oral aspects of HIV, minimizing the devastating effects of oral cancer, revealing novel targets in programmed cell death, designing and testing implants, and reducing oral health disparities.

**According to 2005 federal research grant rankings.*

Great Facilities
NYUCD has transformed a 20th century clinical and research environment to reflect 21st century technology, design and function. The result is a dramatically more productive research environment and vastly improved learning and patient care facilities.

When you consider **NYUCD's commitment** to nurturing **character, ethics and integrity** as the indispensable foundation for learning; a very progressive curriculum; mutually rewarding partnerships between students and faculty; state-of-the-art facilities; access to the largest, most culturally diverse patient population in the nation; and a superb research environment, you have all the ingredients for a one-of-a-kind learning community. We hope that you will share our enthusiasm about becoming part of our great healthcare enterprise.
