

## Facilities & Construction Management Notice of Construction Activity

**Project : The Center for Genomics and Systems Biology  
at 12-16 Waverly Place**

**Notice Date: July 14th, 2009**

### **Purpose:**

To alert the community of Construction Crane delivery, Mechanical Equipment delivery and erection of structural steel for the front 25% of building.

### **Description of Construction Activity:**

Assembling and Installation of construction crane at 16 Waverly Place is expected to take one business day during normal work hours of 7am – 6pm **without street closure**. The scheduled delivery of the crane is pending upon weather conditions and work progress. Currently we expect the crane to arrive on the week of July 27<sup>th</sup> and the mechanical equipment to follow over the next few days. These equipments will be hoisted to the penthouse of the building. Erection of structural steel and decking will follow over the next four (4) weeks.

### **Disruptions:**

Noise - Construction noise will be heard.  
 Sidewalks- N/A  
 Traffic - N/A  
 Parking- N/A  
 Dust - N/A  
 Utilities - None

We thank you for your continued support and cooperation.
