

Facilities & Construction Management Notice of Construction Activity

**Project : The Center for Genomics and Systems Biology
at 12-16 Waverly Place**

Notice Date: August 5th, 2009

Purpose:

To alert the community of hoisting activity with a construction crane at the intersection of Washington Place and Mercer Street.

Description of Construction Activity:

A construction crane will be used to lift mechanical equipment for placement in the cellar of 7 Washington Place. This will be a one day activity which will take place during the time frame of August 12th to August 19th, 2009 from 7am - 6pm. The crane will be situated near the corner of Washington Place and Mercer street. One lane will be closed but the streets will remain open. Flag persons will be situated at locations to ensure smooth flow of traffic.

Disruptions:

Noise - Construction noise will be heard.
 Sidewalks- None
 Traffic - one lane closure (Mercer Street)
 Dust - None
 Utilities - None

We thank you for your continued support and cooperation.
