

## Facilities & Construction Management Notice of Construction Activity

**Project : The Center for Genomics and Systems Biology  
at 12-16 Waverly Place**

**Notice Date: January 30th, 2009**

### **Purpose:**

To alert the community of Street Closure for trucks and crane to lift pipes over 7 Washington Place building and into the courtyard of 12-16 Waverly Place.

### **Description of Construction Activity:**

On Saturday February 7<sup>th</sup>, 2009 from 9am – 4 pm, a construction crane will be set up to lift pipes over the 7 Washington Place building and into the courtyard of 12-16 Waverly Place.

A section of Mercer Street will be closed to vehicular traffic during that time from Waverly Place to Washington Place to accommodate the crane and trucks. Vehicles will not be allowed to park on the street affected by the street closure. Pedestrians will be allowed to use the side walks to access the buildings on the street at the instructions of the flag person on the sidewalks. All proper permits have been obtained from DOT for this work.

### **Disruptions:**

Noise - Truck noise will be heard.

Sidewalks- Minimal

Traffic - See above

Dust - None

Utilities - None

**We thank you for your continued support and cooperation.**
