Assignment 9: 3-5 pages
Due Tuesday, November 9th at 8 P.M. Use Classes to submit this assignment. If you have a problem with Classes, send it by email to your preceptor.
Remember:
• Put your student number but not your name on your assignment. Assignments will be graded anonymously
• No late papers.
• Use your own words—no quotations or paraphrases
• Answer all questions, in order, the number preceding the answer. You can answer some of the questions very briefly, devoting most of your space to one or two questions.

1. What is Cohen & Dennett’s “perfect experiment” and what is it supposed to show?
2. What if anything do you think it shows?
3. Does the appeal to ensemble properties help their case? Since we are not reading Cohen, Dennett and Kanwisher, you can skip this question.
