<i>General preface</i>	ix
<i>Acknowledgments</i>	x
<i>Abbreviations</i>	xvi
1 Overview	1
1.1 Introduction	1
1.2 The central metaphor	4
1.3 Overview of things to come	6
1.4 Ways to read this book	8
2 The stage	10
2.1 Introduction	10
2.2 Notational conventions	11
2.3 Mereology	11
2.3.1 Foundations of algebraic semantics	12
2.3.2 Axiomatizations of classical mereology	16
2.3.3 Mereology vs. set theory	18
2.3.4 Algebraic closure, atomicity, and groups	19
2.3.5 Higher-order properties	23
2.4 Ontology	23
2.4.1 Ordinary objects (type e)	25
2.4.2 Kinds (type e)	26
2.4.3 Events (type v)	27
2.4.4 Intervals (type i)	28
2.4.5 Degrees (type d)	29
2.4.6 Numbers (type n)	32
2.5 Functions	32
2.5.1 Thematic roles (type $\langle v, e \rangle$)	33
2.5.2 Trace functions: runtime and location (type $\langle v, i \rangle$)	35
2.5.3 Measure functions (types $\langle e, d \rangle$ and $\langle v, d \rangle$)	37
2.5.4 Unit functions (types $\langle d, n \rangle$ and $\langle i, n \rangle$)	38
2.5.5 The cardinality function (type $\langle e, n \rangle$)	40
2.6 Nouns	42
2.6.1 Singular count nouns	42
2.6.2 Plural count nouns	43
2.6.3 Measure nouns	46

vi	<i>Contents</i>	
<hr/>		
	2.6.4 Group nouns	47
	2.6.5 Mass nouns	49
	2.6.6 Kind-referring readings	49
	2.7 Verbs	50
	2.7.1 The Neo-Davidsonian position and its alternatives	50
	2.7.2 Lexical cumulativity	52
	2.8 Noun phrases	54
	2.9 Prepositional phrases	57
	2.10 The compositional process	58
3	The cast of characters	61
	3.1 Introduction	61
	3.2 Pseudopartitives	62
	3.3 <i>For</i> -adverbials	65
	3.4 Adverbial- <i>each</i> constructions	68
4	The theory	70
	4.1 Introduction	70
	4.2 What is distributivity?	71
	4.2.1 Quantificational distributivity	71
	4.2.2 Relational distributivity	71
	4.2.3 Predicative distributivity	72
	4.3 Distributive constructions	75
	4.3.1 <i>For</i> -adverbials are distributive constructions	76
	4.3.2 Pseudopartitives are distributive constructions	76
	4.4 The components of a distributive relation	76
	4.5 The constraints on distributive constructions	78
	4.5.1 Capturing predicative distributivity	78
	4.5.2 Adverbial <i>each</i>	84
	4.5.3 Temporal <i>for</i> -adverbials	86
	4.5.4 Pseudopartitives	89
	4.6 Unifying the constraints	93
	4.7 Compositional implementation	96
	4.8 Summary	100
5	Minimal parts	101
	5.1 Introduction	101
	5.2 The minimal-parts problem	101
	5.2.1 The minimal-parts problem for verbal predicates	102
	5.2.2 The minimal-parts problem for mass nouns	103

5.3 Previous accounts of the minimal-parts problem	104
5.3.1 Dowty (1979)	104
5.3.2 Hinrichs (1985)	105
5.3.3 Moltmann (1989, 1991)	107
5.3.4 Link (1991b)	108
5.3.5 Borik (2006)	109
5.3.6 Summing up	110
5.4 Stratified reference as a solution to the minimal-parts problem	110
5.5 Summary	116
6 Aspect and space	117
6.1 Introduction	117
6.2 Subregions versus strata	121
6.3 Implementations of both approaches	125
6.3.1 Dowty (1979) and my proposal	125
6.3.2 Krifka (1998)	128
6.4 Comparing the approaches	129
6.4.1 The subregion-based approach	131
6.4.2 The strata-based approach	135
6.5 Summary	137
7 Measure functions	139
7.1 Introduction	139
7.2 Constraints on measure functions	140
7.3 Previous accounts	141
7.4 Strata theory and measurement	145
7.5 Summary	153
8 Covert distributivity	155
8.1 Introduction	155
8.2 Atomic distributivity	160
8.3 Nonatomic distributivity	163
8.4 Reformulating the D and Part operators	171
8.5 Previous work on event-based distributivity operators	175
8.6 The scopal behavior of <i>for</i> -adverbials	179
8.7 Summary	191
9 Overt distributivity	193
9.1 Introduction	193
9.2 Overt distributivity across languages	196
9.3 Relating overt and covert distributivity	209

viii Contents

9.4	Some more complicated cases	217
9.4.1	<i>Each</i> as a PP modifier	217
9.4.2	<i>Jeweils</i> distributing over a conjunction of verbs	218
9.4.3	<i>Jeweils</i> in subject position	220
9.4.4	Reverse DP-internal distributivity	222
9.5	Distributive determiners	224
9.6	Zimmermann's generalization explained	230
9.7	Previous work: Zimmermann (2002b)	233
9.8	Summary	236
10	Collectivity and cumulativity	239
10.1	Introduction	239
10.2	<i>All</i> and maximality	241
10.3	<i>Numerous</i> -type predicates	243
10.4	<i>Gather</i> -type predicates	245
10.5	Why <i>all</i> distinguishes between <i>numerous</i> and <i>gather</i>	250
10.6	Meaning shift effects triggered by <i>all</i>	254
10.7	From <i>all</i> to <i>each</i> : different granularity levels	258
10.8	<i>For</i> and <i>all</i> block cumulative readings	260
10.9	Open problems	265
10.10	Summary	267
11	Conclusion	269
11.1	Chapter-by-chapter summary	269
11.2	Future work	275
	<i>Appendix: Distributivity operators as repair strategies</i>	280
	<i>References</i>	283
	<i>Index of languages</i>	305
	<i>Index of people</i>	306
	<i>Index of topics</i>	310
