THE FIGHT FOR PEACE
BY HENDRIK WILLEM VAN LOON

A survey of world history from Versailles to Munich showing the break down of International Law and the growth of the aggressor nations. Remarkable films of world events of a quarter of a century unroll before you in little more than an hour. The work of editing this film was done by Al Young in close association with Mr. Van Loon and the spoken dialogue is by David Ross. More than two years was spent in the assembly of the film and the work will stand for all time as the best documentary of the years between World War I and World War II.

The film is offered now in the hope that its showing will point the need for effective action by the United Nations and for effective measures to prevent World War III.
