

# Student Health Center Fees

The Student Health Center is committed to offering high quality and accessible health care at no cost or low cost to matriculated students. In order to honor this commitment to provide comprehensive health care services, we have revised our fee structure. Below you will find a breakdown of the fees that will go into effect August 21, 2009.

We encourage you to make appointments in order to provide you with the best quality healthcare. However, walk-in services still remain available if you feel you cannot wait for an appointment.
