Kate Otto works in the field of public health, at the intersection of new technologies and human behavior. She currently works with the World Bank in Ethiopia assessing the impacts of mobile phone tools on maternal health outcomes, and with partners in Indonesia on designing and deploying a mobile health tool for HIV/AIDS and drug rehabilitation counselors.

Kate’s past projects in the health sector include the development of a mobile health tool for midwives in Indonesia, and training youth leaders of HIV/AIDS programs in Ghana and Tanzania.

A graduate of New York University with a BA in International Relations and a MPA in International Health Policy & Management, Kate is part of several service-driven communities, including the Catherine B. Reynolds Program in Social Entrepreneurship, the Henry Luce Foundation, the Academy of Achievement, and the Truman Scholarship Foundation.
