

***How Neurobiology Can Inform Our Practice
with Children and Adolescents with Autism
and ADHD***

Dr. Yitzchak Frank, Mount Sinai Medical School

Thursday, October 29, 2009

6:00 – 8:00pm

**Silver School of Social Work
Edward Hopper Studio, 4th Floor
1 Washington Square North**

Please join alumni and faculty for our first of three networking events featuring key speakers on important topics relevant to social workers today! Refreshments will be served. Q & A session and opportunity to meet and greet other participants will follow the presentation

Dr. Yitzchak Frank received his M.D. from the Hebrew University – Hadassah Medical School in Jerusalem. He had his training in Pediatrics at the University of Tel Aviv, and his training in Neurology and Pediatric Neurology at the University of Minnesota in Minneapolis. He is Board certified in Psychiatry and Neurology with Special Competence in Pediatric Neurology, and in Neurodevelopmental Disabilities. He is a Professor of Clinical Neurology and Clinical Pediatrics at the Mount Sinai Medical School.

His special interest is in Cognitive and Behavioral Pediatric Neurology including Autism, ADHD and Learning Disabilities. In addition to his practice in the hospital, he teaches medical students and residents. He is the author of numerous articles and books involving these conditions.

To RSVP for this event, please contact Associate Director of Development Lauren Moore at 212-998-6924 or lauren.moore@nyu.edu.
