

# Summer Equipment Schedules

## A Collaboration to Save Energy

### What happens during Summer Mode?

NYU modifies building mechanical systems, elevators and lighting to save energy.

#### What to expect:

➔ Redundant elevators will be shut down.

**SORRY FOR THE LONGER WAIT!**

➔ Lighting will be reduced in ways that will not impact work productivity or safety.

**TRY USING TASK LIGHTING OR  
NATURAL LIGHT INSTEAD!**

➔ Unused spaces will not be air conditioned.

**Thanks for your cooperation**
