

# Educating for Sustainability

A series of lectures sponsored by the NYU Sustainability Task Force and the Environmental Studies Program.

## **Melting Arctic Ice: Climate Change and Sustainable Development**

*Stephanie Pfirman*

**Tuesday, September 11, 2007**

6-7:30 p.m.

Barasch Theater

Jeffrey S. Gould Welcome Center

50 West Fourth Street

As president of the Council of Environmental Deans and Directors, Barnard College professor Stephanie Pfirman is a leader in developing environmental studies as an interdisciplinary field. Her areas of academic expertise include the study of the Arctic environment, the advancement of women in science, and interdisciplinary scholarship.

## **Climate Change at High Latitudes: The Importance of Uncertainty, Variability, and Complex Feedbacks**

*Phil Camill*

**Monday, October 15, 2007**

6-7:30 p.m.

Jurow Lecture Hall

Silver Center for Arts and Science, 1st Floor

32 Waverly Place

Phil Camill is an ecologist at Carleton College whose research on the effects of climate change on the permafrost has been instrumental in understanding the ecological impact of global warming. A legendary teacher, Dr. Camill has been actively involved in creating environmental science curricula for environmental studies programs and in prairie restoration projects.

**RSVP online** at [www.nyu.edu/sustainability](http://www.nyu.edu/sustainability)

**Keep an eye out for** more information on our spring semester speakers:

*Naomi Oreskes*, Monday, February 4, and *Robert Gottlieb*, Monday, March 10

NEW YORK UNIVERSITY

RECYCLED PAPER

This poster was printed with vegetable and soy inks on 100% postconsumer paper made with windpower using a chemical-free production process.
