Professor Howard Besser  
H72.3049: The Culture of Archives, Museums, and Libraries (4 points)  

Class meets in 721 Broadway, Room 670, Wednesdays, 12:30-4:30 pm.  
• Besser office hours: 665 Broadway, Rm. 612, Wed 4:30-6:00 and by appointment. Tel 212-992-9399, howard@nyu.edu  

Course Description:  
This course studies the different kinds of institutions that collect and manage cultural material: museums of art, natural history, and motion pictures; libraries, archives, and historical societies; corporate institutions. It compares and contrasts these types of institution to reveal how they differ from one another, paying particular attention to how different institutional missions affect internal metadata and information systems. It also looks at how the various institution types may handle similar material in significantly different ways (from what they acquire, to how they describe it, to how they display or preserve it). It examines theories of collecting, the history and ethics of cultural heritage institutions, the organizational structures of institutions that house collections (including trends in staffing and the roles of individual departments), and their respective missions and operational ethics. The class will visit a variety of local cultural organizations, and will have working professionals talk about their organizations and duties. The course is required for students in the MA Program in Moving Image Archiving and Preservation, but we welcome students from other Programs.  

Student requirements:  
--an observational study of two cultural institutions for in-class presentation (for details, see last 2 pages of syllabus) (20%);  
--a term project on a subject you must negotiate with the instructor, to be presented in class at the end of the semester—both as an oral presentation and written up (for details, see last 2 pages of syllabus) (35%)  
--At least 4 times during the semester you must bring in to class a current news article related to cultural institutions, and orally explain this to the rest of the class. Topics might include private collectors, contested objects, hirings/firings, cultural institution expansions, etc. You should aim to present 2 of these before midterm, and the other 2 by the end of the semester (10%).  
--class attendance, keeping up with the readings, presenting readings, participation in class discussion, including during field trips (25%).  
--contribute at least 3 observations to a class blog discussion within the 2 weeks following the fieldtrip to MMI (at least 1 within the first week after the trip). MIAP students will also have to report back from their visit to the National Audiovisual Conservation Center in Culpeper. (10%).  

No incompletes are accepted for this class.  

NB: The readings and topics on this syllabus may be added to, and change during the semester. Students are responsible for following such changes. In addition, due to variations in the lengths of discussion, questions, and visual materials, we may not
actually discuss all the readings listed in the syllabus. However, they are important and their content supports the class assignments.

Readings: Selected readings will be posted on Blackboard. Articles from 2003 on from *The Moving Image* are available in electronic form through Project Muse (enter via NYU Libraries from NYU Home http://library.nyu.edu/collections/ejournals.html). Electronic versions of other journals may be available there as well.

Plagiarism:

Plagiarism is the presentation of somebody else’s work as your own. This is a very serious fault, and against NYU rules, whether it is unintended (e.g. occurs through poor citations and confusion about how to reference somebody else’s scholarship), or derives from out and out copying (such as downloading essays from the internet). Plagiarism includes using portions of a previously published work in a paper without citing the source, submitting a paper written for another course, submitting a paper written by someone else, and using the ideas of someone else without attribution. Plagiarism is unacceptable in this class and is punished severely. Please ask for help, by email or in person, if you are unclear as to how to cite others’ work. Anybody who is caught plagiarizing will fail the course and be subject to disciplinary action through the university.

**Topics**

- reports from the Midwinter conference of the American Library Association this past weekend
- Comparative analysis of different types of institution.
- What institutions collect moving images?
- What is the history of cultural institutions?
- How are their histories similar and different?
- How do their histories shape what an institution collects, how they organize their collection, and how they provide access to it?
- Western civilization has relied heavily on surviving written accounts to interpret the past. How has that affected how we see various groups that didn't have the capability to create written accounts, or to make sure that those accounts persist over time? Can we do more justice to those groups by studying artifacts rather than written accounts? Or to those who rely on oral traditions to tell their stories?
- Is history objective?
- Museums and Libraries assert systematic organizations upon their works, and to some degree, all knowledge. What effects does this have outside the walls of these institutions? Are there both positive and negative effects?
- Suzanne Briet's “What is a Document?”

Observational Study

Guidelines:

Choose two or more contrasting cultural institutions, eg. a public library and an art museum, or a science museum and a local historical society.

Visit these institutions for at least 45 minutes each.

In each institution, observe what people do there: what they look at, what they consult or read, who they talk with, how much time they spend with artifacts, how long they stay in one place, etc.. Note if/how digital technologies/moving images are being used in the public areas of the institution you are observing.

Consider how precise you are able to be in making your observations. Will you use a stopwatch? Categorize the visitors? By socio-economic bracket? Nationality? Age? Gender? Approximate mean age? You might consider positioning yourself in a similar type of room, in the two settings.

Note the time of day and day of week you visit, and, if possible, hypothesize how things might be different at different times.

Compare as clearly as you can what happens in each of the places you visit, and write a 2-5 page paper, comparing and summarizing your observations. The paper should be turned in when you present your observations to the class, on 24 February.

Details you might to pay attention to:

1) Methodology--How did you make your observations? Were you seated, did you write on the spot? Did you interact with visitors? Did you use a stopwatch?
2) Do visitors read labels first, or look at objects first? How long do they read for? Look for?
3) Moving image displays: is seating given? Are running times displayed? How is the illumination?
4) Are there guards? How many? Are they trained in the art on display (as they are at the Met)?
5) If an exhibition, is there a pre-determined pathway through it? Is there a central object of the exhibition? A central room?
6) Audio tours. Are visitors listening to curated information using headphones? Cell phones?
7) Are there any interactive displays? Are they being used?
8) Are visitors part of larger groups, families, or visiting in couples, singly?
9) Are there leaflets, flyers, to take away?
10) Is there a cell-phone policy? If so, how is this communicated?
11) Is there a café. A gift shop? How are these positioned in relation to the room you have been observing?
Term Project

More than 1/3 of your grade (35%) will come from a **term project**. This project will have a written component, which is due just before the last class session (noon April 28) and an oral/visual presentation, which you will present during the last class session. The topic and scope of this project must be negotiated with the instructor, but the possible subjects are widespread – almost anything we touch on in class this semester is likely to be fair game for an area of inquiry. Some examples of possible topics:

- a detailed study of a non-US institution of the moving image (a museum, archive, or cinémathèque), including a comparative focus in which you discuss a particular challenge, issue, or part of the history of your chosen archive in relation to another institution with which you are familiar.
- a case-study comparison of one type of collection at at least 2 separate types of organizations (such as documentary films at a research library and at science museum, or botanical prints at an art museum and a library, or home movies at a conventional archive and at film archive).
- a history of a cultural professional organization for which a history has not yet been written (ALA’s Video RoundTable, SAA’s Performing Arts Section, …). You might compile a history from interviews, and might scan and index all the old newsletters of the organization and make those publicly available.
