

LABORATORY WEEKLY EYE/FACE WASH INSPECTION LOG

Applicability: Use this form (or a similar one) to document **weekly** testing by lab staff of eye/face wash units located next to sinks or attached to faucets where water can drain without causing a spill.

DO NOT use for overhead showers or other equipment where water can not be easily directed to a drain. These units are tested by building management.

Procedures

- Post this form (or one of your own that records the same information) at or close to sinks with an eye/face wash.
- Keep area around eye/face wash unit unobstructed and free of electrical equipment.
- Directing water into drain, run the water for 30-60 seconds.
- If water runs clear and pressure is adequate to flush eyes and face, initial next to appropriate date; if not, alert other lab personnel and contact building management for repair.
