#### Course Overview and Goals

Course description: History of Czech Architecture

Prague is a unique city, in which all architectural styles combine: from the pre-Romanesque, to Romanesque and Gothic, Renaissance, Baroque and Classicist styles, to the modern ones that include Historicism, Art Nouveau, the original Cubism in architecture, Art Deco, Constructivism and Functionalism, even the post-war Stalinist architecture, and contemporary trends. The city did not undergo extensive renewals such as occurred in other European metropolises, and thus fragments of various epochs have been left standing here side by side, and partially, there is also the medieval urban layout to be seen. Architects and master builders from many European countries worked here and local architects and artists were also influenced by foreign models. The city is in fact an ideal textbook of architecture from the Middle Ages to the present day. The course should take the students through this development chronologically, in lectures accompanied by projections of pictures and short films, but also in visits to typical buildings, including their interiors. The main emphasis will be put on the period of the 19th and 20th centuries, in which the lecturer specializes. Architecture is linked to other fields, such as fine arts, urban planning, national heritage care, industrial design, and others. Teaching will thus also focus on these. During the course, each of the students will present an independent study of one chosen building: they will analyze the building, place it within a broader context of European architecture and supply it with their own illustrations. They will defend the work. At the end of the term they will sit for a test. There is compulsory and recommended specialist literature in English available for them, and they are expected to supplement the information gained at lectures and excursions by self-study. By the end of the term the student should have acquired some knowledge of the complex development of Central-European architecture, of the most significant figures, and be fairly well informed in related fields.

#### Upon Completion of this Course, students will be able to:

- To understand Czech and Prague architecture and urbanism

- To recognize styles of architecture
- To know more precise information's on leading churches, palaces, houses
- To know how to describe this architecture and details
- To know basic data on leading personalities on architecture and art

## Course Policies

### Attendance and Tardiness

Absences only for medical reasons and for religious observance will be excused. To obtain an excused absence, you are obliged to supply either a doctor's note or corroboration of your illness by a member of the housing staff (either an RA or a Building Manager). To be excused for religious observance, you must contact the instructor and the Academic Director via e-mail one week in advance of the holiday. Your absence is excused for the holiday only and does not include days of travel associated with the holiday. Unexcused absences will be penalized with a 2% percent deduction from your final course grade for every week of classes missed.

**Please note that Friday, November 9 (9am – 5pm) is reserved as a make-up day for missed classes. Do not schedule any trips for this day.**

### Late Submission of Work

In specific cases (illness...). Necessary to inform teacher in time

### Academic Honesty/Plagiarism

According to the Liberal Studies Program Student Handbook, plagiarism is defined as follows:

**Plagiarism is presenting someone else's work as though it were one's own. More specifically plagiarism is to present as one's own a sequence of words quoted without quotation marks from another writer, a paraphrased passage from another writer's work; facts or ideas gathered, organized and reported by someone else, orally and/or in writing. Since plagiarism is a matter of fact, not of the student's intention, it is crucial that acknowledgment of the sources be accurate and complete. Even where there is no conscious intention to deceive, the failure to make appropriate acknowledgment constitutes plagiarism.**

The College of Arts and Science's Academic Handbook defines plagiarism similarly and also specifies the following:

**“presenting an oral report drawn without attribution from other sources (oral or written), writing a paragraph which, despite being in different words, expresses someone else's idea without a reference to the source of the idea, or submitting essentially the same paper in two different courses (unless both teachers have given their permission in advance).**

**Receiving help on a take-home examination or quiz is also cheating – and so is giving that help – unless expressly permitted by the teacher (as in collaborative projects). While all this looks like a lot to remember, all you need to do is give credit where it is due, take credit only for original ideas, and ask your teacher or advisor when in doubt.”**

**“Penalties for plagiarism range from failure for a paper, failure for the course or dismissal from the university.” (Liberal Studies Program Student Handbook)**
