

September 13, 2013

Dear Members of the Open Space Oversight Organization (OSOO):

NYU is looking forward to continuing to work with the OSOO and to making open space improvements that will be enjoyed by our community.

On July 1, 2013, NYU provided the OSOO with initial design concepts for areas along LaGuardia Place, Bleecker Street, and Mercer Street for group members to review with their constituencies. The University asked that the OSOO provide written feedback, based on their constituent interactions, by September 15, 2013 in order to move forward with the design process in a timely manner.

If a deadline extension is required, please submit a written request specifying how much additional time for review is needed. Please submit the request to me (via email is fine) no later than September 15, 2013.

The University is committed to moving forward with the design and review process in a timely manner and hopes to initiate improvements to the spaces as expeditiously as possible.

Sincerely,

Alicia D. Hurley, Ph.D.
Vice President, Government Affairs and Community Engagement
