

NYU

Office of
the Provost

Dear all,

We've updated our advice about adapting to generative AI (ChatGPT and similar tools) for faculty who use written assignments in class.

The updated advice is [here](#), and extends the advice from spring, about ways to forbid use of these tools in class, ways to design assignments that these tools can't do well, and ways to integrate these tools in assignments.

Feel free to share widely.

Thanks,

Clay

Office of the Provost
