

Facility Name:	WITest wireless testbed
Location:	SOE, 5MTC and 6MTC, Brooklyn, NY 11201 and accessible over the Internet
Contact:	Shivendra Panwar/ witest-group@nyu.edu
Website:	http://witestlab.poly.edu/site/index.php

Description: The facility is part of the nationwide GENI infrastructure, a family of open, large-scale, realistic experimental testbeds for innovative network experiments. The NYU site includes two cellular base stations and 25 computer resources with WiFi and cellular networking capability, as well as some with software defined radio hardware. The facility is open to researchers and students in the United States and abroad, and in the last three years it has supported over 7000 hours of active use, by more than 800 users.
