**NOTES**

This is a list of estimated space required to house new / emerging programs, or to increment space that units already have. For example: Tisch IPA has a program totaling approximately 150,000 GSF. It now has approximately 55,000 GSF in multiple locations for its IPA programs, so its incremental space need is 95,000 GSF. When IPA is consolidated in new space, its existing space will be released for other high priority space needs.

Estimated need is listed over two future phases, corresponding roughly to immediate need and subsequent growth.

This list does not include administrative offices that support academic activities, such as the Office of Sponsored Programs, NYU Opportunity Programs, Office of Undergraduate Admissions, Office of Academic Appointments, and so on.
